Which 19th century paintings show the moon?

Which films co-star more than one future head of government?

Star in the Dust	1956 film by Charles F. Haas	2	Clint Eastwood, mayor; George Wallace, Governor of Alabama
The Two Who Stole the Moon	1962 Polish film by Jan Batory	2	Jarosław Kaczyński, Prime Minister of Poland; Lech Kaczyński, Mayor of Warsaw
Ragasiya Police 115	1968 film by B. R. Panthulu	2	M. G. Ramachandran, Chief Minister of Tamil Nadu; Jayalalithaa, Chief Minister of Tamil Nadu
Québec : Duplessis et après...	documentary	2	Bernard Landry, Premier of Quebec; René Lévesque, Premier of Quebec
Q3541438	1994 film by Claude Lanzmann	2	Ariel Sharon, Prime Minister of Israel; Ehud Barak, Prime Minister of Israel
Batman & Robin	1997 American superhero film based on the DC Comics character Batman	2	Arnold Schwarzenegger, Mr. Freeze / Governor of California; Jesse Ventura, Governor of Minnesota

A Free Knowledge Graph

Wikidata

- Wikipedia's knowledge graph
- Free, community-built database
- Large graph
(October 2018: >570M statements on >50M entities)
- Large, active community
(October 2018: >230,000 logged-in human editors)
- Many applications

Freely available, relevant, and active knowledge graph

A short history of Wikidata

- August 2005: Presentation “Wikipedia and the Semantic Web—The Missing Links” at the 1st Wikimedia Conference “Wikimania”, Frankfurt, Germany
- 29th October 2012: [wikidata.org](https://www.wikidata.org) is launched
- 15th Dec 2012: Item with ID number 1000000 created
- 4th Feb 2013: The first statements can be created
- Early 2013: Most Wikipedia language links relocate to Wikidata
- Late 2013: More than 100,000,000 edits on over 15M items
- Dec 2014: Google announces the closure of Freebase and migration to Wikidata
- 2014–2018: A total of >700M edits produce >55M items and >570M statements
- May 2018: Wikidata starts storing data about lexemes (= expressions in a language)
- Oct 2018: Senses of lexemes become supported

Many applications (1)

As of today, Wikidata content has been used in many ways.

Wikipedia & the Wikimedia community:

- Wikipedia inter-language links (see any Wikipedia page)
- Data displays in pages (auto-generated info boxes, article placeholders, result tables, ...)
- Quality checks & edit-a-thons

External re-uses of data:

- Application-specific data-excerpts (e.g., Eurowings in-flight app)
- Data integration and quality control
(e.g., Google checks own KG against Wikidata)
- Authority control & identity provider (VIAF, Open Streetmaps, DBLP, ... link their content to Wikidata)
- Data-driven journalism (individual analyses as well as data-driven information portals)

Many applications (2)

As of today, Wikidata content has been used in many ways.

In research:

- Test data for KG-related algorithms
- Training data for machine-learning approaches
- Wikidata as a subject of study (social dynamics, internationality, biases, . . .)

Uses by Wikidata community:

- Software-supported error and vandalism detection
- Feature-based integration with other datasets
- Data-driven statistics as a measure of progress

What is Wikidata?

Wikidata is often described as **“the free knowledge base that anyone can edit”**
or the **“knowledge graph of Wikipedia”**

It is useful to distinguish several of these aspects:

Wikidata is ...

- ... *a Wikimedia project* like Wikipedia and Wikimedia Commons;
represented and supported by the Wikimedia Foundation (WMF)
- ... *a dataset* that can be downloaded and freely used and distributed
- ... *a website* through which the data can be viewed and modified
- ... *a community* of volunteer editors that creates and controls all content

Two views on the Wikidata knowledge base

The website and its main data services expose Wikidata as a **document-centric knowledge base**:

- Data is grouped by subject entity (one page per entity)
- Documents are structured into different sections
- The order of content is (mostly) preserved and shown

→ Useful for display & management

Conceptually and for most applications, Wikidata is a **graph-structured knowledge base**:

- Main content are binary relationships (from entities to entities/data values)
- Properties are first-class objects with a global scope and definition
- Order does not affect the meaning of statements

→ Useful for sharing and re-use

We will mostly view Wikidata as a knowledge graph
